Frequently asked questions:

What material is being used to make the jewelry tags?

Our jewelry tags are made in stainless steel or brass, plated. There are numerous advantages for using this material: it is elegant, professional, trendy, and can be used for various artistic fashioning.

What additional costs will I be charged?

There are no additional costs. You only pay for the jewelry tag. Our offer includes all additional costs associated with manufacturing the tags and engravings. Most other companies will charge you for manufacturing the prototype, the various tools used to create the shape of the tag, and other costs which will result in additional expenses.

What shapes and sizes can I ask for?

Shapes and sizes are only restricted by the technical limitations. We check your ideas before we go into production, no cost to you. The size can also be adjusted according to your wishes.
